Education. Learning.

Essential building blocks for your insurance career.

We offer courses across the breadth of a modern insurance business, for underwriters, actuaries, accountants, risk managers, claims administrators and more. Our courses range across Life and Health, Property and Casualty, and specialty lines. Programmes are designed for introductory through to advanced, from the broad to the specialist. Our expert instructors have years, sometimes decades, of experience in their particular fields.

New going into 2022, we now provide our products in three forms:

- **onsite** at our Zürich and regional offices
- **virtual trainings** in different time zones
- **self-paced** learning modules

Inclusive in the virtual offerings is our much sought-after **Insurance Management Simulation Programme**, offered in English, Spanish or Mandarin.

If you are serious about boosting your career prospects, or improving the skills of your employees, talk to your client manager or look at our training programmes online:
